### **DETAILED ACTION**

1. The amendment filed on 15 April 2009 has been received and entered. The applicant has cancelled claim 11 and added new claims 14-15. Claims 1-10 and 12-15 as amended are pending in the application.

### ***Allowable Subject Matter***

2. Claims 1-10 and 12-15 are allowed.

3. The following is an examiner's statement of reasons for allowance: The present invention teaches a method for automatically creating a dialog box for displaying data of a process installation. The closest prior art are Wolber et al. U.S. Patent 5,261,043 (hereinafter "Wolber"), Elsbree WO 99/66651 and Petty U.S. Patent 5,784,633. In the case of the Wolber reference, Wolber teaches automatically generating a dialog box (the system generates the display of the dialog box 302 shown in Figure 3) (Wolber: column 4, lines 38-67); selecting at least one data element to be displayed from the data that is transmitted in the dialog box (data "454" is selected, i.e. displayed in box 302- field 310, as shown in Figure 3) (Wolber: column 4, lines 38-67); indicating a memory address of the data element (the input data "454 is output and connected as input to another data via connection 210, as shown in Figure 3) (Wolber: column 4, lines 40-53); and assigning the transmitted data that is to be displayed to certain, stored data types (network programming data that is transmitted has a data type, which is converted to a stored, i.e. accepted data type) (Wolber: column 2, lines 27-40 and 63-68); and automatically generating the at least

one display box on the operator interface of the computer user station so as to display the data to be displayed utilizing display types that are respectively assigned to the data types (the box shown in Figure 3 displays the data being input into the input terminal according to data types; specifically, the input data shown in Figure 3 is a "Real Number" data type, therefore, the box 204 shown in Figure 3 utilizes the display type associated with the "Real Number" data type, i.e. displaying the data as a real number "454") (Wolber: column 4, lines 38-67). In the case of the Elsbree reference, Elsbree teaches the display of process installation data (a computer and machine equipment are connected to allow them to communicate process control information) (Elsbree: page 2, lines 12-27). In the case of the Petty reference, Petty teaches the classification of transmitted data into a category (conveyed data is classified as user data, status data and control data) (Petty: column 8, lines 20-44) consisting of status data, control data and regulating data (conveyed data consists of status data, control data and regulating data, i.e. input/output user data) (Petty: column 8, lines 20-44). However, as indicated by the applicant in the arguments filed on 4/15/2009, the data types in the prior art are used for internal data communication between a personal computer and a modem, whereas in the instant application, the transmitted data are categorized into one of the various data types present in the industrial process installation. As further indicated by the applicant in the arguments filed on 4/15/2009, defining data types involves setting constraints on the datum, such as what values it can take and what operations may be performed upon it and industrial process installations are much more complex than personal computers connected to a modem; therefore, the values of a datum transmitted in an industrial process installation and the operations performed on such a datum are different from values and operations performed on a datum transmitted between a personal computer and

a modem in a personal computer environment. In view of the applicant's arguments and amendments filed on 4/15/2009, the prior art fail to anticipate or render the above limitations obvious.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
